

Dear Fresher

If you intend to bring a personal computer to college please be aware that you will need to register it on the college network. The registration process includes a check to ensure all PCs have up-to-date security patches and antivirus software. Freshers' week is very busy for you and for the college staff, so to save time and make your arrival slightly less stressful, please ensure your PC has the latest version of the operating system, that all the updates have been applied and that an antivirus product is installed.

If you would like to see screenshots of the registration process, please visit either <http://home.jesus.ox.ac.uk/registering-windows-pc.aspx> or <http://home.jesus.ox.ac.uk/registering-mac-pc.aspx> .

If you have any questions or would like advice please contact [it-support@jesus.ox.ac.uk](mailto:it-support@jesus.ox.ac.uk)

Kind regards

Matthew
